Experience

KC GlobEd

Software Developer

Delhi

June 2025 – Present

- Developed a multi-tenant **AI-powered SaaS Agent Platform** using React.js, Node.js, and FastAPI, enabling companies to create no-code AI chatbots with isolated project-level configurations.
- Built a scalable **RAG ingestion pipeline** supporting PDFs, DOCs, CSVs, Excel files, raw text, and website crawling with configurable chunking, embeddings, contextual retrieval, and advanced AI capabilities including tool calling, external APIs, embeddable widgets, and project-level LLM management.
- Improved operational efficiency through conversational **AI admin workflows**, enabling analytics and platform insights using natural language prompts instead of manual filters, while reducing engineering effort.
- Led frontend development of a production-grade **LMS** using React.js, serving **5000+ active students** with mock tests, practice modes, analytics, progress tracking, and scalable dashboards.
- Developed an SEO-optimized SSR website using **Next.js** with admin-controlled CMS management, improving **Core Web Vitals (LCP)** by **30%** and achieving **40% faster rendering**.
- Built a scalable onboarding and examination platform using **Nuxt.js**, integrating **Razorpay**, **Cashfree**, application workflows, exam slot booking, and high-scale admin systems handling concurrent traffic.

CEOITBOX

Associate Software Developer

Delhi

Jan 2024 – June 2025

- Designed a Helpdesk SaaS platform with role-based workflows, escalation logic, and lifecycle management, scaling to handle **16,000+ tickets** with reliable customer support operations.
- Built an **AI-powered support agent** enabling conversational ticket creation, analytics retrieval, and operational insights through natural language prompts without manual filtering workflows.
- Architected a **Task Delegation SaaS platform** serving **200+ organizations**, **800+ users**, and managing **12,000+ tasks** via microservices, alongside a high-scale DLF Vehicle Management System processing lakhs of entries with real-time analytics.

CEOITBOX

SDE Intern

June 2023 – Dec 2023

- Developed CBXMEET, a MERN scheduling platform supporting **80+ users** and **4,300+ meetings** with Google OAuth and Calendar, along with an internal HR Feedback System handling **300+ feedback submissions** across **50+ users**.

Projects

MatchVatch (Dating Platform) & E-Commerce WebApp (Multi-Seller Marketplace)

- Co-built MatchVatch, a startup dating platform, developing the backend using Node.js (Fastify) and MySQL and contributing to the **iOS mobile application using React Native**, focusing on scalable APIs, secure data handling, and real-time user interactions.
- Built a scalable multi-seller e-commerce platform with seller dashboards, product management, real-time order notifications, analytics, and role-based access control, delivering a responsive and efficient user experience; **GitHub:** [Link](#) **Live:** [Link](#)

Education

Bachelor of Technology in Information Technology

University Institute of Engineering and Technology, CSJMU, Kanpur
CGPA: 7.0 / 10.0

2020 – 2024

Achievements

- Secured **1st place** in college-wide web development hackathon (400+ participants).
- Selected for **Smart India Hackathon** institutional finals.
